Spring into Safety!

DAYLIGHT SAVINGS TIME - SUNDAY MARCH 12 www.celebratesafety.com

SPRING INTO ACTION
with these Safety Tips

Think About:

New or different equipment / PPE / personnel for task

Changing angle of the sun - keep windshield clean

Springtime run off - flash flooding is possible

Surfaces - potholes and sidewalks that have heaved

New/modified procedures - communicate changes

Emergency Action Plans - now is the perfect time to update and review your EAP with employees

**Use a Job Hazard Analysis (JHA) or
Use a Job Safety Analysis (JSA)**

VISUAL MESSAGES BRING REMINDERS

Put Your Safety Message on a Cookie,
Oreo, or Brownie

Spring into Safety!

DAYLIGHT SAVINGS TIME - SUNDAY MARCH 12 www.celebratesafety.com

Stay Committed to your safety culture!

Keep Safety Front and Center During Change of Seasons

- **Risk of a heart attack and stroke increases**
- **Moods can be affected by disruption**
- **Lack of sleep can exacerbate feelings of depression, anxiety, mental exhaustion**

CHANGES CAN BRING RISK

- Change can result in unforeseen consequences
 - Risk of injuries and hazards is much higher during periods of change
 - Temporary changes can add risk to workplace operations
- Risks are amplified in operations with hazardous chemicals, materials, heavy machinery

Why Serve Safety Cookies and Brownies?

- * Keeps workers connected and informed.
- * Shares important company messages & reminders.
- * Shows leadership commitment to employee safety.
- * Customizes your reminders for safe work practices.
- * Contributes to a culture of working safely.

WSO INDIA NEW BUSINESS VENTURES

In an effort to continuously promote safety and broaden our scope of work in the best interest of the organization, WSO India recently ventured into a business agreement with Oceantrade Media Private Ltd, a Mumbai based Indian International Maritime Business Company specialized in blue economy creating various Business to Business (B2B) platforms to some of the core maritime segments within the industry to be a supporting partner for their inaugural edition of **Maritime Occupational Health Safety & Environment Summit 2023** (India's dedicated Shipping, Ports, Marine, Offshore , Oil & Gas OHSE Trade Show) held in Mumbai on 12th &13th January 2023 at Nehru Exhibition Centre, Worli, Mumbai, India.

The Maritime OHSE Summit was a great success, which brought together the National and International Product Companies, Consultants, Service Providers, Trainers, HSE Experts, The Statutory Bodies and respective Ministries under one umbrella for two days for comprehensive business discussions and networking. The OHSE Summit further provided us the opportunity to organize the **WSO India (State) Level Maritime OHSE Awards 2022** in association with the organizers to recognize individual, company or organization that has demonstrated commitment to maritime occupational health and safety and protection of the environment, regardless of their size or the sector they operate within.

In continuation with this efforts, WSO India lately joined hands with International Business Conferences (IBC), a large-scale summit organizer based in Mumbai to be a Supporting Partner for their Annual **HSE Summit 2023 "Leadership in Contractor Safety Management"** held in Mumbai on 19th &20th January 2023. The two days event was represented by Mr. Daniel Johnson from our end and was attended by safety practitioners from leading organizations in the Construction, Manufacturing, Pharma, Oil & Gas verticals across the nation and provided us with a unique opportunity for promotion of our organisation and operations across all sectors.

Apart from being a supporting partner in all their endeavors, we are now working on IBC's proposal and invitation to WSO India to be an Accreditation Partner for all of their Client trainings, Summits and Customized In-house trainings. This will give more value addition to the safety professionals and the same time it will help us in expanding our footprint in India. WSO India will continue to collaborate with IBC in the areas of shared interests to promote Occupational Health, Safety and Environment at all levels.

A Token of Appreciation presented to WSO India by Mr. Nitin Shah, Director, IBC for the support

Program, brochure, and other information from the WSO India event held in January

INTRODUCTION

- September 2022- Container ship sailed from China with containerised cargo for Singapore India & UAE. Around Colombo one of the containers (with an Indian consignee) caught fire. Ship had to be diverted to Colombo and around 140 containers discharged for further investigation. General average declared by shipowners.

WHAT IS GENERAL AVERAGE? WHO WILL PAY FOR GENERAL AVERAGE CONTRIBUTION? Will it be the insurers or the shipper or the consignee!!!!

What is "MARINE INSURANCE"?

Does it include both marine perils and war risk perils. In a normal Insurance cover "War Risks" are excluded. Is it necessary to take war risks cover? Especially in the backdrop of Russia-Ukraine conflict, how important is it to take war risk cover. Or even for those ships which do not visit the conflict area, should they take this cover, if yes then at what stage.

- Besides shipowners, what type and extent of cover should charterers and cargo owners take. Is it mandatory to take cargo cover.
- What are various types of claims associated with international transportation of goods and how to protect oneself from such claims.

All these and many more queries will be highlighted by this course.

INTRODUCTION

This year our Honourable Prime Minister of India Shri Narendra Modi declared two massive campaigns. The theme of symposium stands dedicated to 75th year of Azadi ka Amrit Mahotsav. Its contribution to the country's future advancement in times to come but also possesses the strength and capacity to realise Honourable Prime Minister's Vision of enacting India 2.0, which gets inspired by the spirit of Aatmanirbhar Bharat and expectations towards golden era.

Contractor Safety Management (CSM) is one of the most critical aspect of Health and Safety Management program. This highly interactive workshop will provide you with insights in to aspects related to managing contractors and contract management, implementation of contractor safety management across various business sectors.

Most organizations out source high risk activities and expose personnel to significant health and safety risks which can result in serious or fatal incidents. Across all business sectors Serious Injuries and Fatalities (SIF) occur mostly to contractor employees resulting serious business impact.

A comprehensive approach towards implementing CSM is needed to achieve health and safety excellence. This approach includes design and implementation CSM processes and verifying its effectiveness.

This workshop cum conference will develop your ability to critically assess your contractors at all stages of contract management life cycle to ensure productivity and safety.

IBC have invited domain experts from different industries to share their experiences, case studies and leadership presentations that they have pioneered in this Leadership in Contractor Safety Management 2023. It a matter of pride that every expert Speaker has vast, sumptuous, and enriched experience to back with and it will be a pleasure to hear their views on specific topics they shall deliberate in this Leadership in Contractor Safety Management. These luminaries have delivered their talks in national and international symposia. This ensemble of luminary speakers will equivocally deliberate on the topic of Leadership in Contractor Safety Management. Whereas the chosen individual topic shall be a treat for the audience to get new insights on those particular aspects of Safety.

In view of the foregoing, we strongly feel that this International Leadership in Contractor Safety Management 2023, will justify to dwell on extremely critical & pertinent sub-topics / topics.

The details of the time schedule, topic of the talks and profile of eminent speakers is given. We are sure that you would not like to miss this opportunity learning from their vast experiences on topics which are close to their heart and the Speakers are enthusiastic to share it.

OBJECTIVES

- Develop understanding on CSM and its impacts on Health and Safety performance.
- Learn and apply Industry best practices across various sectors in CSM.
- Adopt risk mitigation approaches to prevent harm to contractors.

PERSONAL IMPACT

Participants will learn how to effectively assess, validate and monitor contractors using a variety of proven management techniques and interpersonal skills.

The personal impact will be:

- Understanding the key components of a contractor validation system.
- Gaining skills and improving confidence in vetting contractors.
- Learning how to implement a contractor management system.
- Understanding and evaluating the core elements of a successful contractor management system.
- Increased knowledge in evaluating contractor health and safety performance.
- Understanding business benefits.

WHO SHOULD ATTEND?

- All Line Managers, Supervisors and Team Leaders.
- Project Managers.
- Procurement and Supply Chain Managers.
- Engineers and Maintenance Personnel.
- HSE Managers and Auditors.
- Employee Representatives.
- All Personnel Involved in selecting or vetting contractors.

THIS SUMMIT WILL HIGHLIGHT

- The Key Components of an Effective Contractor Management System.
- The Importance of Communication, Co-operation and coordination.
- How to Positively Influence the Performance of Contractors.
- How to Carry-out Meaningful and Effective performance Monitoring.
- The Visible Business Benefits.

ORGANISATIONAL IMPACT

By successfully managing the performance of contractors, an organization will ensure they are effectively controlling risks and protecting their reputation and profile.

The organizational impact will be:

- Effective contractor pre-qualification and selection.
- Improved contractor control and performance.
- Getting better return on investment through improvement in productivity and safety during execution of high risk jobs in operations and projects.
- Reduced Health and Safety risks resulting in lower Serious Injuries and Fatality Incidents.
