Good Morning,

I am sure most have you have seen yesterday's issue of *QuickTakes*, OSHA's biweekly newsletter, (see below) but we wanted to flag two important items for your information:

(1) QuickTakes will now be published in both English and Spanish. Please share this update with your members and stakeholders, and encourage them to subscribe if they have not done so already!

(2) If you are interested in participating in any of OSHA Region 2's Amputation Stand-Down events during the month of September, please sign up as soon as possible (and encourage your members/stakeholders to do the same), as space is limited. Registration is open for all four events here, and you must register individually for each event. Please note: When you submit the registration form, it will not display a confirmation; it will simply reload the form. Rest assured that your information has been submitted and kindly DO NOT submit multiple registrations for a single event, as this may prevent others from registering. In addition, please allow at least 24 hours to receive confirmation email(s).

Please share this information with your members and stakeholders, as appropriate.

Arlene Williams
Directorate of Cooperative and State Programs
